

WEIGH-TRONIX

For precise weight
measurement of
individual animals

Livestock Scales

Livestock scales

Features and benefits

Versatile design – End gates open wide for unrestricted access. Folding ramps lock onto frames for easy movement of the scale from one location to another. Scale platform may be purchased separately and fitted to your own custom-built pen.

Built tough – All welded, steel construction. Weigh Bar sensors are solid steel and are sealed against dust and moisture.

Two sizes – Large model designed for cattle, smaller model facilitates hogs and sheep.

Weigh Bar® accuracy – Patented system cancels out side, end and torsional forces to provide a true measurement of downward load. Fully electronic design eliminates moving parts which are subject to wear and misadjustment. Maintains consistent accuracy regardless of temperature variations.

Microprocessor based indicators – Scales may be equipped with a choice of easy to read indicators which offer a variety of options including remote display and computer interface, Plug-in printers are also available for a permanent record of weights and other data.

Specifications

	Model SAS 2660	Model SAS 3096
Capacity:	2,000 lb x 1, .2, .5, 1.0 and 2.0	5,000 lb x .5, 1.0, 2.0
Deck size:	26" x 60"	30" x 96"
Deck height:	5 ³ / ₄ "	6 ³ / ₄ "
Overall size: (ramps down)	26" x 113"	30" x 151"
Overall height:	52 ¹ / ₄ "	81"
Shipping weight:	750 lb	945 lb

Accuracy:

Meets or exceeds requirements specified by NBS handbook 44 and Canadian standards.

Warranty: Two year limited warranty applies.
